Report to Council

Date: January 25, 2021

To: Council

From: City Manager

Subject: Heritage Planning Best Practices Review

Department: Policy & Planning

Recommendation:

THAT Council receives, for information, the report from the Policy and Planning Department, dated January 25, 2021, outlining best practices in heritage management;

AND THAT Council direct staff to bring forward a report to an afternoon meeting with a proposed approach for Heritage Management based on Council feedback.

Purpose:

To review available heritage planning tools and heritage management best practices and provide Council with an opportunity to provide feedback.

Background:

Over the last year, several development applications have illustrated the complexity around the identification and protection of heritage assets on private property, both inside and outside of the Heritage Conservation Area. In response, Council passed resolution #0639-40 on September 28, 2020 directing staff to bring forward information for a heritage policy and procedures workshop. This report and the attached presentation follow up on that resolution.

Discussion:

Elana Zysblat, a certified Heritage Professional, from ANCE Consulting will provide a presentation that covers three key areas related to Heritage management. First, the presentation will provide Council with an update on the current best practices in heritage planning in Canada. Next the report will overview the main heritage planning tools available to local governments in British Columbia and the role of these tools. Lastly, the report will review the role of heritage professionals and heritage advisory committees in the development review process. This report will provide a foundation for Council to update its approach to heritage management in the coming years. Staff will be bringing a follow-up report forward to provide Council some recommendation on next steps.

WHAT IS HERITAGE?????

"Heritage is an essentially collective and public notion. Though heritage is certainly valued by individuals, its reason for being, by definition, is to sustain a sphere of public interest and public good". Randall Mason, Economics and Heritage Conservation, 1999.

Heritage Revitalization Agreement

HRAs are legal agreements that supersede local zoning regulations, providing incentives for owners to conserve heritage properties.

HRAs are likely our most powerful and flexible tool - supporting both heritage retention and rehabilitation and other OCP priorities.

HRAs do NOT set precedence because each one is written to suit a unique property, its unique context and unique heritage asset.

A good HRA balances private and public benefits.

"...to allow some flexibility in the permitted uses on the property and to create two new units in the existing basement. This request is primarily driven by the desire to create revenue sources to meet the financial needs and high costs associated with operating and maintaining a large heritage property. The strata owners also see this as an opportunity to provide for some accommodation and local commercial needs within the broader area of Kelowna General Hospital while maintaining the property's residential form and character".

A wonderful Kelowna experience!

April 17, 2018 / in / by Louise Brace

"I stayed at the Cadder House for a month during my clinical rotation at KGH. It really felt like a home away from home. Yolanda and Rick went out of their way to make sure my roommate and I had everything we needed to be comfortable. A beautiful place and amazing hosts. I will definitely be back! Thanks Yolanda for a wonderful Kelowna experience."

“

"The Cadder House is beautiful. I stayed here for a month during my clinical rotation. The Cadder House is indeed a home away from home. It is fairly central, so even without a car, downtown, parks and beaches are within walking distance. Thank you for making my stay comfortable and enjoyable! I will definitely be back!"
