Scattering Options

Why scatter ashes at a cemetery?

The Kelowna Memorial Park Cemetery has two dedicated and licensed areas that will always remain as interment areas providing you and your loved ones with peace-of-mind.

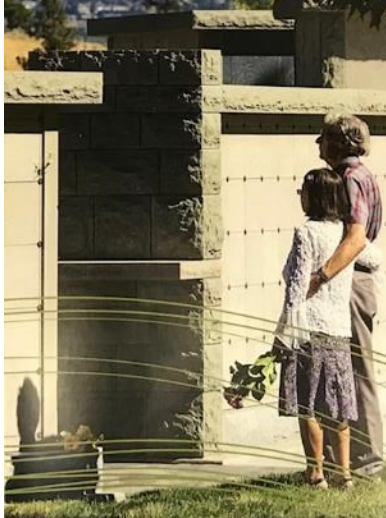

Cremation scattering is available within the Promontory Green Scattering Garden and the Dilworth Mountain Scattering Trail, a naturalized area at the base of one of Kelowna's most distinctive mountains. Scattering of cremated remains is only permitted in these designated areas and families must obtain a permit from the Cemetery office. Also available is the option of honouring your loved one with a small bronze plaque that will memorialize the scattering forever.

Family Urns

The Family Urn

The Family Urns are situated at the entrance to the stunning Legacy Gardens, providing a peaceful and contemplative space for friends and family to visit.

Cored from a single piece of smooth granite, the seamless and sleek urns can accommodate up to **eight cremated remains**. Each set of ashes are placed in a small, soft urn, then interred within the family urn.

*The Family Urn. A special legacy for you and your family...
...forever.*
