- sector designations denote geographical areas as designated on attached Sector maps A1 to A5

4. DCC charges to be allocated proportionately by formula to each service

Commercial or Institutional Calculation

The measurement unit for Commercial and Institutional development is square meters of floor area. The calculation of floor area of a commercial or institutional building is based on the gross floor area which is measured from the outside edge of all exterior walls, less the area used for parking of motor vehicles and bicycles in the building permit application.

Industrial Calculation

The measurement unit for Industrial development is hectares of site area. The calculation of industrial site area is based on the gross area of the site that is proposed for development in a building permit application, including access, parking and loading and excludes landscaped areas and the undeveloped portion of the site that is being held in its pre-developed state for future additional development (0.405 hectares minimum).
