- 6.11.2 **Finished grades** shall not deviate more than 1.0 metre from the rough grading elevation as identified on a lot grading plan, where such a plan has been approved by the City at the time of subdivision when the **lot** was created.
- 6.11.3 Where there is no lot grading plan that was approved by the City at the time of subdivision when the lot was created, the grading of the **lot** should retain the natural contour of the land (**natural grade**) and any grading should have the lot slopes absorbed within the building massing such as stepped foundations to minimize the need for grades steeper than 3:1 ratio.

The plans must be included with the [building permit](#) application. The site plan must be drawn to scale and must clearly illustrate the [lot](#) size and configuration, [building](#) locations, [parking spaces](#), [loading spaces](#), on-site circulation, access driveways, [landscaping](#), [fences](#), and any other details relevant to the review of the [development](#) proposal.
- 8.1.2 Off-street [parking spaces](#) shall not be credited as off-street [loading spaces](#) or vice versa.
- 8.1.3 In lieu of providing the required number of off-street parking spaces where the [City](#) owns and operates a parking facility within [urban centres](#), a property [owner](#) within an [urban centre](#) may pay to the [City](#) a sum of money equal to the number of [parking spaces](#) not provided multiplied by the applicable cash-in-lieu amount as determined by the [Payment in Lieu of Parking Bylaw No. 8125](#). Cash-in-lieu is not permitted where compliance with Ministry of Transportation & Infrastructure (MOTI) standards is required.

 - (d) shall be designed to allow forward entry to and exit from the [lot](#) on which the parking or [loading](#) area is located directly to a dedicated public [street](#) or [lane](#), without encumbering any lands other than the subject [lot](#). This provision does not apply where parking or [loading](#) can be provided and accessed directly from an abutting [lane](#). This provision shall not apply where [tandem parking](#) results in the provision of three or more [parking spaces](#) where access is from a local collector road or a road of a lesser standard as identified in the [City](#) of Kelowna's [Official Community Plan](#);
- 8.1.5 No required parking shall be provided parallel to and flanking a [lane](#) unless the parking area is accessible by a driveway and is screened from the [lane](#) by a physical barrier.

Within the [Core Area](#), University South [Village Centre](#), and Glenmore Valley [Village Centre](#), the total minimum off-street vehicle parking requirements for any residential and any commercial use (e.g. office and retail) can be reduced by five (5) parking spaces per car share vehicle (must provide a new vehicle to a [car-share organization](#) and the car-share spaces are counted to the overall parking count) subject to the following regulations:

- the maximum reduction in total required parking is 20% (for base parking requirement); and
- the car-share vehicle parking space must be located on-site or within 100 metres of the subject property, in a highly visible spot, at-grade, publicly accessible at all times (i.e., not within an enclosed parkade), clearly marked for the exclusive use of the shared vehicle and guaranteed to operate for a minimum of two years.

8.2.12 [Parking spaces](#) for secondary uses shall be provided in addition to the required [parking spaces](#) for the [principal use](#) on a [lot](#).

8.2.13 Where calculation of the total number of [parking spaces](#) yields a fractional number:

- (a) any fraction less than one-half (0.5) rounds down to the nearest whole integer (including zero); and
- (b) any fraction one-half (0.5) or greater rounds up to the nearest whole integer.

8.2.14 Where [gross floor area](#) is used as a unit of measurement for the calculation of required [parking spaces](#), it must exclude all parking and [loading](#) areas, secure bicycle parking areas, common stairways and mechanical rooms within the [building](#).

8.2.15 Where [Table 8.3 Required Parking](#) does not clearly define requirements for a [development](#), the single use class or combination of use classes most representative of the proposed [development](#) shall be used to determine the parking requirements.

8.2.16 Where a [development](#) consists of a mix of use classes, the total off-street parking requirement shall be the sum of the off-street parking requirements for each use class.

- (a) notwithstanding Section 8.2.16, in mixed-use [developments](#) the [parking spaces](#) required for [offices](#) and other [commercial related land uses](#) can be shared with the residential visitor parking requirements. [Parking spaces](#) must be available for both land uses (commercial and visitor) at all times.

Accessible Parking Standards

8.2.17 The minimum accessible parking shall be provided as a function of the total number of parking space provided onsite as described in Table 8.2.17 and illustrated in Figure 8.2.17:

Total Number of Parking Spaces Onsite.	Minimum Number of Required Accessible Parking Spaces	Minimum Number of Required Van-Accessible Parking Spaces
1 – 4 spaces	0 spaces	0 spaces
5 – 36 spaces	1 space	0 spaces
37 – 68 spaces	2 spaces	1 space
69 – 100 spaces	3 spaces	1 space
101-150 spaces	4 spaces	1 space
151-200 spaces	5 spaces	1 space
201-300 spaces	6 spaces	2 spaces
301-400 spaces	7 spaces	2 spaces
401-500 spaces	8 spaces	2 spaces
Over 500 spaces	2% of the total spaces	2 spaces

Note: The number of van-accessible parking spaces is included in the minimum required accessible parking spaces. For example: if six (6) accessible parking spaces are required and two (2) van accessible parking spaces are required the total number of accessible parking spaces is six (6) and two (2) of which must be van accessible.

- (a) if a visitor **parking space** is required, then at least one of those visitor **parking spaces** shall be configured as an accessible **parking space**;
- (b) designate as an accessible **parking space** using appropriate signage;
- (c) include accessible **parking spaces** in the calculation of the applicable minimum parking requirement; and
- (d) accessible **parking spaces** shall be located as close to a main **building** entrance, on a level non-skid surface.

8.4 Off-Street Loading

8.4.1 Where **development** is proposed, including new **development**, change of **use** of existing **development**, or enlargement of existing **development**, off-street **loading spaces** shall be provided by the property **owner** in accordance with the requirements of this Bylaw. **Detention and correction services** located within a security **fence** are exempt from providing off-street **loading spaces**.

Number of Spaces

8.4.2 The number of off-street **loading spaces**, including bus **loading spaces**, required for each use is specified in **Table 8.4 Minimum Loading Required**. The maximum number of **loading spaces** required by this section is three (3) spaces.

8.4.3 Where calculation of the total number of **loading spaces** yields a fractional number, the following counting rules apply (unless specifically defined in **Table 8.4 Minimum Loading Required**):

- (a) any fraction less than one-half (0.5) rounds down to the nearest whole integer (including zero); and
- (b) any fraction one-half (0.5) or greater rounds up to the nearest whole integer.

8.4.4 Where **gross floor area** is used as a unit of measurement for the calculation of required **loading spaces**, it must exclude all parking and loading areas, secure bicycle parking areas, common stairways and mechanical rooms within the **building**.

8.4.5 Where **Table 8.4 Minimum Loading Required** does not clearly define requirements for a particular **development**, the single use class or combination of use classes is most representative of the proposed **development** shall be used to determine the **loading space** requirement.

8.4.6 Where a **development** consists of a mix of **use** classes, the total off-street **loading** requirement shall be the sum of the off-street **loading** requirements for each **use** class, unless there is a complementary demand or differences in periods of use for **loading** that warrants a different requirement.

Location

8.4.7 Off-street **loading spaces** shall be provided entirely within the **lot** of the **development** being served.

8.4.8 Off-street **loading spaces** shall be oriented away from residential **development**.

Size and Access

- 8.4.9 Each off-street **loading space** shall be of adequate size and accessibility to accommodate the vehicles expected to load and unload, but in no case shall a **loading space** be less than 28 metres² in area, less than 3.0 metres in width, or have less than 4.0 metres in overhead clearance.
- 8.4.10 Each required bus **loading space** shall be a minimum of 3.6 metres in width, a minimum of 12.2 metres in length, and have a minimum **clearance** of 4.6 metres.
- 8.4.11 Access to any **loading** area shall be provided, wherever possible, internally to the **development** or from a **lane** abutting the **development**.
- 8.4.12 Access to any **loading** area shall be arranged such that no backing or turning movement of vehicles going to or from the site causes interference with traffic on the abutting **streets** or **lanes**.

8.5 Off-Street Bicycle Parking

- 8.5.1 Where any **development** is proposed, including new **development**, change of use of existing **development**, or enlargement of existing **development**, off-street bicycle parking shall be provided by the property **owner** in accordance with the requirements of this Bylaw.
- 8.5.2 The number of **short-term** and **long-term bicycle parking** spaces required for each use class is specified in Table 8.5 Minimum Bicycle Parking Required.
- 8.5.3 Where calculation of the total number of off-street bicycle parking spaces yields a fractional number:
 - (a) any fraction less than one-half (0.5) rounds down to the nearest whole integer (including zero); and
 - (b) any fraction one-half (0.5) or greater rounds up to the nearest whole integer.
- 8.5.4 Where the bicycle parking schedule does not clearly define requirements for a particular **development** the single use or combination of use most representative of the proposed **development** shall be used to determine the parking requirement.

8.5.5 Short-term bicycle parking standards:

- (a) short-term bicycle parking must be conveniently located within: 15 metres of any main entrances (whether inside or outside of the building), a well-lit area, clearly visible to visitors, and subject to casual surveillance by occupants of the building(s).
- (b) short-term bicycle parking spaces shall be provided in a bicycle rack that is permanently anchored to the ground or a wall.
- (c) design and install short-term bicycle parking to the minimum dimensions shown in Table 8.5.1 Minimum Dimensions for Bicycle Parking and illustrated in Figure 8.5.1

8.5.6 Long-term bicycle parking standards:

- (a) long-term bicycle parking must be located inside a building or within a secure, weather-protected, dedicated bicycle parking facility accessible to residents, employees, or other identified users of the building.
- (b) the entry door into the long-term bicycle parking facility must have a minimum width of 0.9 metres.
- (c) long-term bicycle parking spaces can be arranged in a ground-anchored or wall-mounted configuration provided that:
 - i. a minimum 50% of the required long-term bicycle parking shall be ground-anchored.
 - ii. wall-mounted bicycle racks located in front of an automobile stall within a parkade will only be counted towards the minimum long-term bicycle parking if the automobile stall meets the minimum regular - size vehicle standards.
- (d) a minimum of 75% of the long-term bicycle parking spaces shall be located at-grade or within one storey of finished grade and shall be easily accessible to users.
- (e) long-term bicycle parking spaces must have a minimum unobstructed height clearance of 1.9 metres between the floor and any mechanical equipment, or, if there is no mechanical equipment, between the floor and the ceiling.
- (f) design and install long-term bicycle parking spaces to the minimum dimensions shown in Table 8.5.1 Minimum Dimensions for Bicycle Parking and illustrated in Figure 8.5.2.
- (g) For any residential development a "bicycle repair and wash station" is required after 20 long-term bicycle parking stalls are required. For any commercial or industrial development see Section 8.6 End-of-Trip Facilities for "bicycle repair and wash station". A "bicycle repair and wash station" includes tools for bikes, a commercial grade pump, access to water, and a way to raise a bike up to perform simple maintenance.

FOOTNOTES (Section 14.11.):

- .1 The minimum setback can be reduced from 3.0 m to 2.0 m for **ground-oriented** residential units if both of these criteria are met:
 - a) The maximum first floor **height** above adjacent curb level for **ground-oriented** residential units is 1.2 m. **Height** is measured from the grade at the sidewalk directly from a fronting publicly accessible **street**, walkway, open space or applicable **lot line**. See **Example Diagram**.
 - b) The minimum **net floor area** for **ground-oriented** residential units on the first floor is 11m². See **Example Diagram**.

The minimum setback can be reduced from 3.0 m to 0.0 m for any **ground-oriented** commercial units if at least a 6.0 m setback in the UC2, UC3, & UC4 zones and 4.5 m setback in the UC5 zone is maintained from back-of-curb (or edge of road pavement in situations without curb) to building face.
- .2 Any portion of a **building** above 16.0 m in **height** must be setback a minimum of 3.0 m from any **lot line abutting** a **street** and 4.0 m from any **lot line abutting** another property.
- .3 Except it is 3.0 m when **abutting** a core area neighbourhood (C-NHD) or an education / institutional (EDINST) future land use designation as outlined in the **Official Community Plan**.
- .4 Except it is 6.0 m when **abutting** a core area neighbourhood (C-NHD) or an education / institutional (EDINST) future land use designation as outlined in the **Official Community Plan**.

- .6 The minimum side yard is 4.0 m when **abutting** a **single & two dwelling zone** or **rural residential zone**.
- .7 For portions of a parkade with **lane** access which do not project more than 2.3 m above **finished grade**, the **rear yard** setback for the parkade is 1.5 m The site rear yard for **carport structures** is 1.5 m.
- .8 Any **building** over 6 **storeys** in height, the portions of the **building** over 6 **storeys** must be setback a minimum of 10 m from any **lot line abutting** any **single & two dwelling zone** or **rural residential zone**. FOOTNOTES (Section 14.14.):

- ^{.1} When referencing maximum base FAR and maximum height regulations the “areas” referenced are the building height maps outline within the City of Kelowna’s Official Community Plan.
- ^{.2} The maximum height of 3 additional storeys & 12 metres only applies in situations where:
 - a) Lots are located fronting a collector or arterial road; &
 - b) Lots are within 400 m of transit stop; &
 - c) The abutting lots are not zoned RR1, RR2, RU1, RU2, RU3, RU4, or RU5.
- ^{.3} The Public Amenity & Streetscape bonus density and additional height may apply if payment is made as per Section 6.8.2 Density Bonus. The Rental or Affordable Housing bonus density and additional height may apply if secured as described in Section 6.8.3 Density Bonus.
- ^{.4} The maximum height for hotels is permitted to be 12 storeys & 39 m only in situations where:
 - a) lots are fronting a Provincial Highway; and
 - b) the abutting lots are not zoned RR1, RR2, RU1, RU2, RU3, RU4, or RU5; and
 - c) lots are within the Regional Commercial Corridor Future Land Use Designations as outlined in the OCP.
- ^{.5} For the purpose of calculating minimum densities the amount of commercial area considered as a unit will be measured at 1 unit per 125 m² of commercial GFA.

- ^{.6} The maximum height of 6 additional storeys & 22 m only applies in situations where:
 - a) Lots are located fronting a Transit Supportive Corridor &
 - b) Lots are within 400 m of transit stop; &
 - c) Lots are within 500 m of an Urban Centre; &
 - d) Lots must be fronting one of these roads: Clement Avenue, Gordon Drive, a Provincial Highway, Spall Road, Enterprise Way, or Springfield Drive.
- ^{.7} Except the maximum base FAR and height may be different on an individual lot basis as identified in Section 14.15 Site Specific Regulations.
- ^{.8} The maximum FAR is increased to 3.0 for lots fronting onto one of these streets: Bay Avenue, Brent Avenue, Clement Avenue, Crowley Avenue, Ellis Street, Ethel Street, Gaston Avenue, Gordon Drive, Guy Street, Laurel Avenue, Recreation Avenue, St. Paul Street, Trench Place, Vaughan Avenue, or Weddell Place.
- ^{.9} The base FARs are derived from the base height regulation. Therefore, the base FARs remain constant even if an owner successfully applies for a Development Variance Permit or Board of Variance order to the base heights.
- ^{.10} For example: a 12 storey rental project would have a 0.6 FAR bonus and a 26 storey rental project would 1.3 FAR bonus.
- ^{.11} These parcels identified in Map 14.15.1 do not qualify for any density or height bonusing except the rental bonusing provisions.
- ^{.12} If eighty percent (80%) of the parking provided on-site is located underground (below finished grade) then the base FAR is increased by 0.25 FAR.
