Development Permit

DP21-0179

City of Kelowna

This permit relates to land in the City of Kelowna municipally known as

1055 Frost Road

and legally known as

Lot 1 District Lot 579 SDYD Plan EPP74481

and permits the land to be used for the following development:

Apartment Housing

The present owner and any subsequent owner of the above described land must comply with any attached terms and conditions.

Date of Council Approval:	**May 15, 2023**
Development Permit Area:	Form & Character
Existing Zone:	MF3 – Apartment Housing
Future Land Use Designation:	VC – Village Centre

This Development Permit is valid for two (2) years from the date of approval, with no opportunity to extend.

This is NOT a Building Permit.

In addition to your Development Permit, a Building Permit may be required prior to any work commencing. For further information, contact the City of Kelowna, Development Services Branch.

NOTICE

This permit does not relieve the owner or the owner's authorized agent from full compliance with the requirements of any federal, provincial or other municipal legislation, or the terms and conditions of any easement, covenant, building scheme or agreement affecting the building or land.

Owner:	Highstreet Canyon Falls Apartments Ltd., Inc. No. BC1311111
Applicant:	Highstreet Ventures Inc.

_____

Terry Barton
Development Planning Department Manager
Planning & Development Services

_____

Date of Issuance

1. SCOPE OF APPROVAL

This Development Permit applies to and only to those lands within the Municipality as described above, and any and all buildings, structures and other development thereon.

This Development Permit is issued subject to compliance with all of the Bylaws of the Municipality applicable thereto, except as specifically varied or supplemented by this permit, noted in the Terms and Conditions below.

The issuance of a permit limits the permit holder to be in strict compliance with regulations of the Zoning Bylaw and all other Bylaws unless specific variances have been authorized by the Development Permit. No implied variances from bylaw provisions shall be granted by virtue of drawing notations that are inconsistent with bylaw provisions and that may not have been identified as required Variances by the applicant or Municipal staff.

2. CONDITIONS OF APPROVAL

THAT Council authorizes the issuance of Development Permit No. DP21-0179 for Lot 1 District Lot 579 SDYD Plan EPP74481 located at 1055 Frost Road, Kelowna, BC, subject to the following:

a) The dimensions and siting of the building to be constructed on the land be in accordance with Schedule "A";

b) The exterior design and finish of the building to be constructed on the land be in accordance with Schedule "B";

c) Landscaping to be provided on the land be in accordance with Schedule "C";

d) The applicant be required to post with the City a Landscape Performance Security deposit in the amount of 125% of the estimated value of the Landscape Plan, as determined by a Registered Landscape Architect.

3. PERFORMANCE SECURITY

As a condition of the issuance of this Permit, Council is holding the security set out below to ensure that development is carried out in accordance with the terms and conditions of this Permit. Should any interest be earned upon the security, it shall accrue to the Developer and be paid to the Developer or his or her designate if the security is returned. The condition of the posting of the security is that should the Developer fail to carry out the development hereby authorized, according to the terms and conditions of this Permit within the time provided, the Municipality may use enter into an agreement with the property owner of the day to have the work carried out, and any surplus shall be paid over to the property owner of the day. Should the Developer carry out the development as per the conditions of this permit, the security shall be returned to the Developer or his or her designate following proof of Substantial Compliance as defined in Bylaw No. 12310. There is filed accordingly:

a) An Irrevocable Letter of Credit **OR** certified cheque **OR** a Surety Bond in the amount of **$2,154,327.96**

Before any bond or security required under this Permit is reduced or released, the Developer will provide the City with a statutory declaration certifying that all labour, material, workers' compensation and other taxes and costs have been paid.

4. INDEMNIFICATION

Upon commencement of the works authorized by this Permit the Developer covenants and agrees to save harmless and effectually indemnify the Municipality against:

a) All actions and proceedings, costs, damages, expenses, claims, and demands whatsoever and by whomsoever brought, by reason of the Municipality said Permit.

All costs, expenses, claims that may be incurred by the Municipality where the construction, engineering or other types of works as called for by the Permit results in damages to any property owned in whole or in part by the Municipality or which the Municipality by duty or custom is obliged, directly or indirectly in any way or to any degree, to construct, repair, or maintain.

The PERMIT HOLDER is the <u>CURRENT LAND OWNER</u>.
Security shall <u>ONLY</u> be returned to the signatory of the Landscape Agreement or their designates.

1 - LANDSCAPE PLAN AREA 1

SCALE 1:300

LANDSCAPE NOTES

1. ALL WORK TO CONFORM WITH CANADIAN LANDSCAPE STANDARDS CURRENT EDITION
2. ALL EXISTING TREES ARE TO BE PROTECTED DURING CONSTRUCTION. ADEQUATE FENCING/HOARDING SHOULD BE ERECTED PRIOR TO CONSTRUCTION TO ENSURE THE TREES AND THEIR ROOTS ARE PROTECTED.
3. ALL TREES MUST BE HIGH HEADED WITH FULL UNIFORM CROWNS AND WELL DEVELOPED LEADERS. TREES WITH BROKEN LEADERS WILL NOT BE ACCEPTED. ALL PLANT MATERIAL MUST CONFORM TO CNLA STANDARDS.
4. ALL PLANTING MUST CONFORM TO CITY OF KELOWNA MINIMUM STANDARD UTILITY SETBACKS.
5. ALL TREE PLANTING ADJACENT UTILITIES TO BE HAND DUG.
6. SHRUB PLANTING TO HAVE MINIMUM 300mm TOPSOIL WITH MINIMUM 100mm DEPTH ROCK MULCH PULLED BACK FROM PLANT STEMS AND TREE TRUNKS TO ALLOW FOR AIR CIRCULATION TO THE ROOT SYSTEM.
7. THERE WILL BE NO SUBSTITUTIONS OF MATERIAL, PRODUCTS,SIZE, OR QUANTITIES WITHOUT THE PRIOR CONSENT OF THE LANDSCAPE ARCHITECT OR OWNERS REPRESENTATIVE. ANY UNDERSIZED MATERIAL WILL NOT BE ACCEPTED AND WILL BE REQUIRED TO BE REPLACED AT THE CONTRACTOR'S EXPENSE.
8. FOR PLANTING SPECIFICATIONS, REFER TO PLANTING SCHEDULE AND TREE/SHRUB PLANTING DETAILS.
9. REFER TO CIVIL ENGINEERING DRAWNGS FOR UTILITY SERVICING AND SITE GRADING PLAN.
10. ROCK MULCH TO EXTEND UNDER ALL CANTILEVERED BALCONIES.
11. ALL PLANTING BED OR ROCK MULCH GROUND COVERERS ADJACENT TURF ARE TO BE SEPARATED BY ALUMINUM EDGING.
12. ALL ABOVE GROUND ELECTRICAL FURNITURE INCLUDING UTILITY BOXES AND TRANSFORMERS TO BE WRAPPED FOLLOWING BC HYDRO GUIDELINES.
13. ALL TREES TO HAVE MINIMUM 3 CUBIC METERS OF SOIL MIX AND ADEQUATE GROWING SPACE, TO THE SATISFACTION OF THE LANDSCAPE ARCHITECT AND CITY OF KELOWNA..

UTILITY SETBACK INFORMATION

TREES SHALL BE SETBACK A MINIMUM DISTANCE, MEASURED FROM THE CENTER OF THE TREE TRUNK, FROM ABOVE AND BELOW GRADE UTILITIES AND PROPERTY LINES AS FOLLOWS:

DISTANCE FROM LIGHT STANDARDS/POWER HARDWARE	3.5m
DISTANCE FROM FIRE HYDRANTS	3.5m
DISTANCE FROM STOP SIGNS	3.5m
DISTANCE FROM YIELD SIGNS	3.5m
DISTANCE FROM TRANSIT ZONES	3.5m*
DISTANCE FROM OTHER SIGNS	2.0m
DISTANCE FROM PRIVATE PROPERTY ON WALKWAY ROW	2.0m
DISTANCE FROM PRIVATE PROPERTY ON OPEN PARKLAND	3.0m
DISTANCE FROM PRIVATE PROPERTY ON BOULEVARDS	1.0m
DISTANCE FROM SHALLOW UNDERGROUND UTILITIES	1.0m
DISTANCE FROM GAS OR OIL ROW CONTACT UTILITY	
DISTANCE FROM DEEP UNDERGROUND UTILITIES	1.5m
DISTANCE FROM SANITARY AND STORM SEWERS	1.8m
DISTANCE TO SANITARY AND STORM SEWERS AND MANHOLES	2.0m
DISTANCE FROM WATER MAINS	2.5m

*ENSURE TREES DO NOT CREATE SIGHTLINE OBSTRUCTIONS FOR VEHICLES APPROACHING TRANSIT ZONES

TREES SHALL BE SETBACK A MINIMUM DISTANCE, MEASURED FROM THE CENTER OF THE TREE TRUNK, TO WALKWAY AND ROADS AS FOLLOWS:

ARTERIAL ROAD MEDIAN CURB FACE	2.0m*
COLLECTOR ROAD MEDIAN CURB FACE	3.15m*
LOCAL ROAD MEDIAN CURB FACE	2.6m*
ARTERIAL ROAD BOULEVARD CURB FACE	2.0-3.0m**
COLLECTOR ROAD BOULEVARD CURB FACE	1.25m*
LOCAL ROAD BOULEVARD CURB FACE	1.25m*
INDUSTRIAL COLLECTOR ROAD MEDIAN CURB FACE	2.65m
INDUSTRIAL LOCAL ROAD MEDIAN CURB FACE	3.15m*
INDUSTRIAL COLLECTOR ROAD BOULEVARD CURB FACE	1.65m
INDUSTRIAL LOCAL ROAD BOULEVARD CURB FACE	1.25m
DISTANCE FROM DRIVEWAYS	1.5m
DISTANCE FROM SIDEWALKS	1.0m

SCHEDULE C

This forms part of application

DP21-0179

City of Kelowna COMMUNITY PLANNING

LANDSCAPE STATISTICS:

IN ACCORDANCE WITH THE CITY OF KELOWNA ZONING BYLAW SECTION 7.2, THE FOLLOWING LANDSCAPE PROVISIONS AREA REQUIRED:

- ONE TREE IS REQUIRED PER 55m2 OF LANDSCAPE AREA OR 1 TREE PER 10 LINEAR METRES OF LANDSCAPE AREA (WHICHEVER IS MORE). THE RATIO OF TREES SHALL BE A MINIMUM OF 50% FOR LARGE TREES AND A MAXIMUM OF 25% FOR SMALL TREES.
- LANDSCAPE AREA MEANS THE AREA LOCATED WITHIN THE REQUIRED FRONT YARD SETBACK AREAS, REAR YARD SETBACK AREAS, AND INDUSTRIAL SIDE YARD SETBACK AREAS SETBACK AREA UP TO A MAXIMUM OF 3.0 METERS.

MF3 REQUIRED SETBACKS:
FRONT YARD: 3.0m
SIDE YARD (STEELE): 3.0m
SIDE YARD (ELDERBERRY): 4.5m
REAR YARD: 4.5m

SETBACK AREA TOTAL: 2803

TREES REQUIRED TOTAL: 51
TREES PROVIDED: **214**
- CONIFEROUS: 35
- DECIDUOUS: 179

SHRUBS PROVIDED: **1,618**

EXISTING TREES TO BE REMOVED: 2
EXISTING TREES TO REMAIN: 13

TOTAL NON-PERMEABLE AREA: 12,145m²
TOTAL PERMEABLE AREA: 25,780m²

LANDSCAPE ENLARGEMENT PLAN

PROJECT: CANYON FALLS , KELOWNA

Drawing No. **L300**

Project No. 619-002 | Scale AS SHOWN

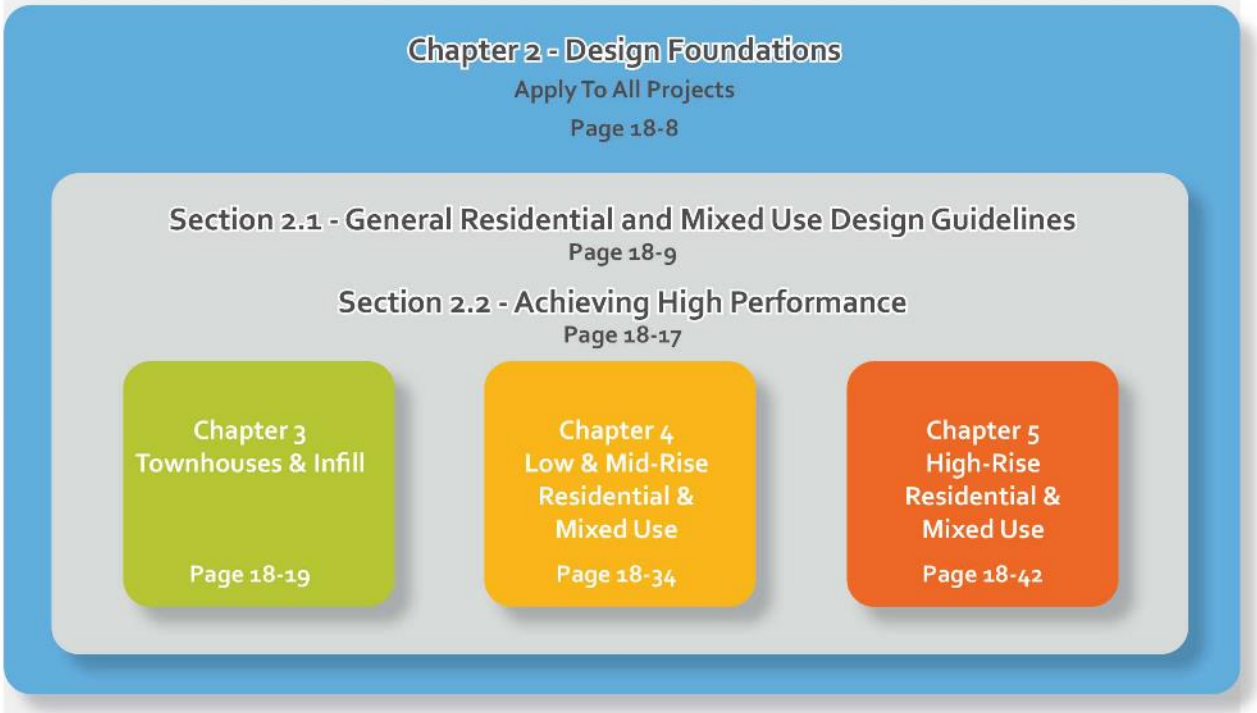
FORM & CHARACTER – DEVELOPMENT PERMIT GUIDELINES

Chapter 2 - The Design Foundations : apply to all projects and provide the overarching principles for supporting creativity, innovation and design excellence in Kelowna.

- Facilitate Active Mobility
- Use Placemaking to Strengthen Neighbourhood Identity
- Create Lively and Attractive Streets & Public Spaces
- Design Buildings to the Human Scale
- Strive for Design Excellence

The General Residential and Mixed Use Guidelines : provide the key guidelines that all residential and mixed use projects should strive to achieve to support the Design Foundations.

- The General Guidelines are supplement by typology-specific guidelines (e.g., Townhouses & Infill on page 18-19, High-Rise Residential and Mixed-Use on page 18-42), which provide additional guidance about form and character.



***Note: Refer to the Design Foundations and the Guidelines associated with the specific building typology.**

Consideration has been given to the following guidelines as identified in Chapter 18 of the City of Kelowna 2040 Official Community Plan:

SECTION 2.0: GENERAL RESIDENTIAL AND MIXED USE						
RATE PROPOSALS COMPLIANCE TO PERTINENT GUIDELINE *(1 is least complying & 5 is highly complying)*	**N/A**	**1**	**2**	**3**	**4**	**5**
2.1 General residential & mixed use guidelines						
2.1.1 Relationship to the Street	**N/A**	**1**	**2**	**3**	**4**	**5**
a. Orient primary building facades and entries to the fronting street or open space to create street edge definition and activity.					✓	
b. On corner sites, orient building facades and entries to both fronting streets.				✓		
c. Minimize the distance between the building and the sidewalk to create street definition and a sense of enclosure.					✓	
d. Locate and design windows, balconies, and street-level uses to create active frontages and 'eyes on the street', with additional glazing and articulation on primary building facades.						✓
e. Ensure main building entries are clearly visible with direct sight lines from the fronting street.				✓		
f. Avoid blank, windowless walls along streets or other public open spaces.						✓
g. Avoid the use of roll down panels and/or window bars on retail and commercial frontages that face streets or other public open spaces.	✓					
h. In general, establish a street wall along public street frontages to create a building height to street width ratio of 1:2, with a minimum ratio of 1:3 and a maximum ration of 1:1.75. • Wider streets (e.g. transit corridors) can support greater street wall heights compared to narrower streets (e.g. local streets); • The street wall does not include upper storeys that are setback from the primary frontage; and • A 1:1 building height to street width ratio is appropriate for a lane or mid-block connection condition provided the street wall height is no greater than 3 storeys.						✓
2.1.2 Scale and Massing	**N/A**	**1**	**2**	**3**	**4**	**5**
a. Provide a transition in building height from taller to shorter buildings both within and adjacent to the site with consideration for future land use direction.				✓		
b. Break up the perceived mass of large buildings by incorporating visual breaks in facades.					✓	
c. Step back the upper storeys of buildings and arrange the massing and siting of buildings to: • Minimize the shadowing on adjacent buildings as well as public and open spaces such as sidewalks, plazas, and courtyards; and • Allow for sunlight onto outdoor spaces of the majority of ground floor units during the winter solstice.						✓

2.1.3 Site Planning	N/A	1	2	3	4	5
a. Site and design buildings to respond to unique site conditions and opportunities, such as oddly shaped lots, location at prominent intersections, framing of important open spaces, corner lots, sites with buildings that terminate a street end view, and views of natural features.					✓	
b. Use Crime Prevention through Environmental Design (CPTED) principles to better ensure public safety through the use of appropriate lighting, visible entrances, opportunities for natural surveillance, and clear sight lines for pedestrians.						✓
c. Limit the maximum grades on development sites to 30% (3:1)						✓
d. Design buildings for 'up-slope' and 'down-slope' conditions relative to the street by using strategies such as: • Stepping buildings along the slope, and locating building entrances at each step and away from parking access where possible; • Incorporating terracing to create usable open spaces around the building • Using the slope for under-building parking and to screen service and utility areas; • Design buildings to access key views; and • Minimizing large retaining walls (retaining walls higher than 1 m should be stepped and landscaped).						✓
e. Design internal circulation patterns (street, sidewalks, pathways) to be integrated with and connected to the existing and planned future public street, bicycle, and/or pedestrian network.					✓	
f. Incorporate easy-to-maintain traffic calming features, such as on-street parking bays and curb extensions, textured materials, and crosswalks.						✓
g. Apply universal accessibility principles to primary building entries, sidewalks, plazas, mid-block connections, lanes, and courtyards through appropriate selection of materials, stairs, and ramps as necessary, and the provision of wayfinding and lighting elements.						✓
2.1.4 Site Servicing, Access, and Parking	**N/A**	**1**	**2**	**3**	**4**	**5**
a. Locate off-street parking and other 'back-of-house' uses (such as loading, garbage collection, utilities, and parking access) away from public view.						✓
b. Ensure utility areas are clearly identified at the development permit stage and are located to not unnecessarily impact public or common open spaces.						✓
c. Avoid locating off-street parking between the front façade of a building and the fronting public street.						✓
d. In general, accommodate off-street parking in one of the following ways, in order of preference: • Underground (where the high water table allows) • Parking in a half-storey (where it is able to be accommodated to not negatively impact the street frontage);				✓		

• Garages or at-grade parking integrated into the building (located at the rear of the building); and • Surface parking at the rear, with access from the lane or secondary street wherever possible.						
e. Design parking areas to maximize rainwater infiltration through the use of permeable materials such as paving blocks, permeable concrete, or driveway planting strips.	✓					
f. In cases where publicly visible parking is unavoidable, screen using strategies such as: • Landscaping; • Trellises; • Grillwork with climbing vines; or • Other attractive screening with some visual permeability.						✓
g. Provide bicycle parking at accessible locations on site, including: • Covered short-term parking in highly visible locations, such as near primary building entrances; and • Secure long-term parking within the building or vehicular parking area.						✓
h. Provide clear lines of site at access points to parking, site servicing, and utility areas to enable casual surveillance and safety.						✓
i. Consolidate driveway and laneway access points to minimize curb cuts and impacts on the pedestrian realm or common open spaces.						✓
j. Minimize negative impacts of parking ramps and entrances through treatments such as enclosure, screening, high quality finishes, sensitive lighting and landscaping.						✓
2.1.5 Streetscapes, Landscapes, and Public Realm Design	**N/A**	**1**	**2**	**3**	**4**	**5**
a. Site buildings to protect mature trees, significant vegetation, and ecological features.	✓					
b. Locate underground parkades, infrastructure, and other services to maximize soil volumes for in-ground plantings.						✓
c. Site trees, shrubs, and other landscaping appropriately to maintain sight lines and circulation.						✓
d. Design attractive, engaging, and functional on-site open spaces with high quality, durable, and contemporary materials, colors, lighting, furniture, and signage.						✓
e. Ensure site planning and design achieves favourable microclimate outcomes through strategies such as: • Locating outdoor spaces where they will receive ample sunlight throughout the year; • Using materials and colors that minimize heat absorption; • Planting both evergreen and deciduous trees to provide a balance of shading in the summer and solar access in the winter; and • Using building mass, trees and planting to buffer wind.						✓
f. Use landscaping materials that soften development and enhance the public realm.						✓

g. Plant native and/or drought tolerant trees and plants suitable for the local climate.						✓
h. Select trees for long-term durability, climate and soil suitability, and compatibility with the site's specific urban conditions.						✓
2.1.6 Building Articulation, Features and Materials	**N/A**	**1**	**2**	**3**	**4**	**5**
a. Express a unified architectural concept that incorporates variation in façade treatments. Strategies for achieving this include: • Articulating facades by stepping back or extending forward a portion of the façade to create a series of intervals or breaks; • Repeating window patterns on each step-back and extension interval; • Providing a porch, patio, or deck, covered entry, balcony and/or bay window for each interval; and • Changing the roof line by alternating dormers, stepped roofs, gables, or other roof elements to reinforce each interval.						✓
b. Incorporate a range of architectural features and details into building facades to create visual interest, especially when approached by pedestrians. Include architectural features such as: bay windows and balconies; corner feature accents, such as turrets or cupolas; variations in roof height, shape and detailing; building entries; and canopies and overhangs. Include architectural details such as: Masonry such as tiles, brick, and stone; siding including score lines and varied materials to distinguish between floors; articulation of columns and pilasters; ornamental features and art work; architectural lighting; grills and railings; substantial trim details and moldings / cornices; and trellises, pergolas, and arbors.						✓
c. Design buildings to ensure that adjacent residential properties have sufficient visual privacy (e.g. by locating windows to minimize overlook and direct sight lines into adjacent units), as well as protection from light trespass and noise.						✓
d. Design buildings such that their form and architectural character reflect the buildings internal function and use.						✓
e. Incorporate substantial, natural building materials such as masonry, stone, and wood into building facades.						✓ ✓
f. Provide weather protection such as awnings and canopies at primary building entries.				✓		
g. Place weather protection to reflect the building's architecture.					✓	
h. Limit signage in number, location, and size to reduce visual clutter and make individual signs easier to see.	✓					
i. Provide visible signage identifying building addresses at all entrances.	✓					

SECTION 4.0: LOW & MID-RISE RESIDENTIAL MIXED USE						
RATE PROPOSALS COMPLIANCE TO PERTINENT GUIDELINE *(1 is least complying & 5 is highly complying)*	**N/A**	**1**	**2**	**3**	**4**	**5**
4.1 Low & mid-rise residential & mixed use guidelines						
4.1.1 Relationship to the Street	**N/A**	**1**	**2**	**3**	**4**	**5**
i. Ensure lobbies and main building entries are clearly visible from the fronting street.				✓		
j. Avoid blank walls at grade wherever possible by: • Locating enclosed parking garages away from street frontages or public open spaces; • Using ground-oriented units or glazing to avoid creating dead frontages; and • When unavoidable, screen blank walls with landscaping or incorporate a patio café or special materials to make them more visually interesting.					✓	
Residential & Mixed Use Buildings						
k. Set back residential buildings on the ground floor between 3-5 m from the property line to create a semi-private entry or transition zone to individual units and to allow for an elevated front entryway or raised patio. • A maximum 1.2 m height (e.g. 5-6 steps) is desired for front entryways. • Exceptions can be made in cases where the water table requires this to be higher. In these cases, provide a larger patio and screen parking with ramps, stairs and landscaping.						✓
l. Incorporate individual entrances to ground floor units accessible from the fronting street or public open spaces.						✓
m. Site and orient buildings so that windows and balconies overlook public streets, parks, walkways, and shared amenity spaces while minimizing views into private residences.						✓
4.1.2 Scale and Massing	**N/A**	**1**	**2**	**3**	**4**	**5**
a. Residential building facades should have a maximum length of 60 m. A length of 40 m is preferred.				✓		
b. Residential buildings should have a maximum width of 24 m.						✓
c. Buildings over 40 m in length should incorporate a significant horizontal and vertical break in the façade.						✓
4.1.3 Site Servicing, Access, and Parking	**N/A**	**1**	**2**	**3**	**4**	**5**
a. On sloping sites, floor levels should step to follow natural grade and avoid the creation of blank walls.						✓
b. Site buildings to be parallel to the street and to have a distinct front-to-back orientation to public street and open spaces and to rear yards, parking, and/or interior court yards: • Building sides that interface with streets, mid-block connections and other open spaces and should positively frame and activate streets and open spaces and support pedestrian activity; and						✓

• Building sides that are located away from open spaces (building backs) should be designed for private/shared outdoor spaces and vehicle access.						
c. Break up large buildings with mid-block connections which should be publicly-accessible wherever possible.						✓
d. Ground floors adjacent to mid-block connections should have entrances and windows facing the mid-block connection.				✓		
4.1.4 Site Servicing, Access and Parking	**N/A**	**1**	**2**	**3**	**4**	**5**
a. Vehicular access should be from the lane. Where there is no lane, and where the re-introduction of a lane is difficult or not possible, access may be provided from the street, provided: • Access is from a secondary street, where possible, or from the long face of the block; • Impacts on pedestrians and the streetscape is minimised; and • There is no more than one curb cut per property.				✓		
b. Above grade structure parking should only be provided in instances where the site or high water table does not allow for other parking forms and should be screened from public view with active retail uses, active residential uses, architectural or landscaped screening elements.					✓	
c. Buildings with ground floor residential may integrate half-storey underground parking to a maximum of 1.2 m above grade, with the following considerations: • Semi-private spaces should be located above to soften the edge and be at a comfortable distance from street activity; and • Where conditions such as the high water table do not allow for this condition, up to 2 m is permitted, provided that entryways, stairs, landscaped terraces, and patios are integrated and that blank walls and barriers to accessibility are minimized.					✓	
4.1.5 Publicly-Accessible and Private Open Spaces	**N/A**	**1**	**2**	**3**	**4**	**5**
a. Integrate publicly accessible private spaces (e.g. private courtyards accessible and available to the public) with public open areas to create seamless, contiguous spaces.						✓
b. Locate semi-private open spaces to maximize sunlight penetration, minimize noise disruptions, and minimize 'overlook' from adjacent units.						✓
Outdoor amenity areas						
c. Design plazas and urban parks to: • Contain 'three edges' (e.g. building frontage on three sides) where possible and be sized to accommodate a variety of activites; • Be animated with active uses at the ground level; and • Be located in sunny, south facing areas.						✓
4.1.6 Building Articulation, Features, and Materials	**N/A**	**1**	**2**	**3**	**4**	**5**
a. Articulate building facades into intervals that are a maximum of 15 m wide for mixed-use buildings and 20 m wide for residential						✓

buildings. Strategies for articulating buildings should consider the potential impacts on energy performance and include: • Façade Modulation – stepping back or extending forward a portion of the façade to create a series of intervals in the façade; • Repeating window pattern intervals that correspond to extensions and step backs (articulation) in the building façade; • Providing a porch, patio, deck, or covered entry for each interval; • Providing a bay window or balcony for each interval, while balancing the significant potential for heat loss through thermal bridge connections which could impact energy performance; • Changing the roof line by alternating dormers, stepped roofs, gables, or other roof elements to reinforce the modulation or articulation interval; • Changing the materials with the change in building plane; and • Provide a lighting fixture, trellis, tree or other landscape feature within each interval.						
b. Break up the building mass by incorporating elements that define a building's base, middle and top.						✓
c. Use an integrated, consistent range of materials and colors and provide variety, by for example, using accent colors.						✓
d. Articulate the façade using design elements that are inherent to the buildings as opposed to being decorative. For example, create depth in building facades by recessing window frames or partially recessing balconies to allow shadows to add detail and variety as a byproduct of massing.						✓
e. Incorporate distinct architectural treatments for corner sites and highly visible buildings such as varying the roofline, articulating the façade, adding pedestrian space, increasing the number and size of windows, and adding awnings or canopies.				✓		
f. Provide weather protection (e.g. awnings, canopies, overhangs, etc.) along all commercial streets and plazas with particular attention to the following locations: • Primary building entrances;, • Adjacent to bus zones and street corners where people wait for traffic lights; • Over store fronts and display windows; and • Any other areas where significant waiting or browsing by people occurs.	✓					
g. Architecturally-integrate awnings, canopies, and overhangs to the building and incorporate architectural design features of buildings from which they are supported.					✓	
h. Place and locate awnings and canopies to reflect the building's architecture and fenestration pattern.						✓
i. Place awnings and canopies to balance weather protection with daylight penetration. Avoid continuous opaque canopies that run the full length of facades.						✓

j.	Provide attractive signage on commercial buildings that identifies uses and shops clearly but which is scaled to the pedestrian rather than the motorist. Some exceptions can be made for buildings located on highways and/or major arterials in alignment with the City's Sign Bylaw.	✓					
k.	Avoid the following types of signage: • Internally lit plastic box signs; • Pylon (stand alone) signs; and • Rooftop signs.	✓					
l.	Uniquely branded or colored signs are encouraged to help establish a special character to different neighbourhoods.	✓
