

PARKS DEVELOPMENT

PARKLAND ACQUISITION & DEVELOPMENT FUNDING STRATEGY

COUNCIL WORKSHOP 2

October 16, 2017

Martin Bell
Urban Systems

Parks Funding – Workshop Series Overview

- ▶ Workshop #1 - Context and Public Policy Discussions
- ▶ Workshop #2 - Building an Evaluation and Priority Setting Tool
- ▶ Workshop #3 - Developing Our Funding and Financing Strategy

Summary of Workshop #1 – October 2nd

What we heard:

- Shift the tilt from Parks Acquisition towards more Parks Development
- Do not draw funds away from other priorities such as transportation in order to fund parks, instead:
 - shift priorities within the existing budget, or
 - look for additional funding sources for parks
- Explore tools to collect funds for parks in specific urban areas that are densifying such as: Capri/Landmark; South Pandosy; Rutland Town Centre

Summary of Workshop #1 – October 2nd

What we heard:

- Explore options for Parks Improvement DCCs with development community:
 - Explore tolerance for upward movement in Parks DCCs to pay for improvements?
 - Keep overall DCC rates the same but shift some component to parks development?
 - Provide developers with DCC credits for parks they build?

Summary of Workshop #1 – October 2nd

What we heard:

- ▶ Consider making the parks partnership requirements firmer and more consistent – ensure that as new neighbourhoods are built, developers provide them with finished neighbourhood parks
- ▶ Consider Linear Parks, along with Regional Parks and other parks not necessarily owned by the City, in the inventory of available parks space
- ▶ Explore potential to open up parks that aren't 100% developed, or don't yet meet our standards, however the potential likely depends on the situation

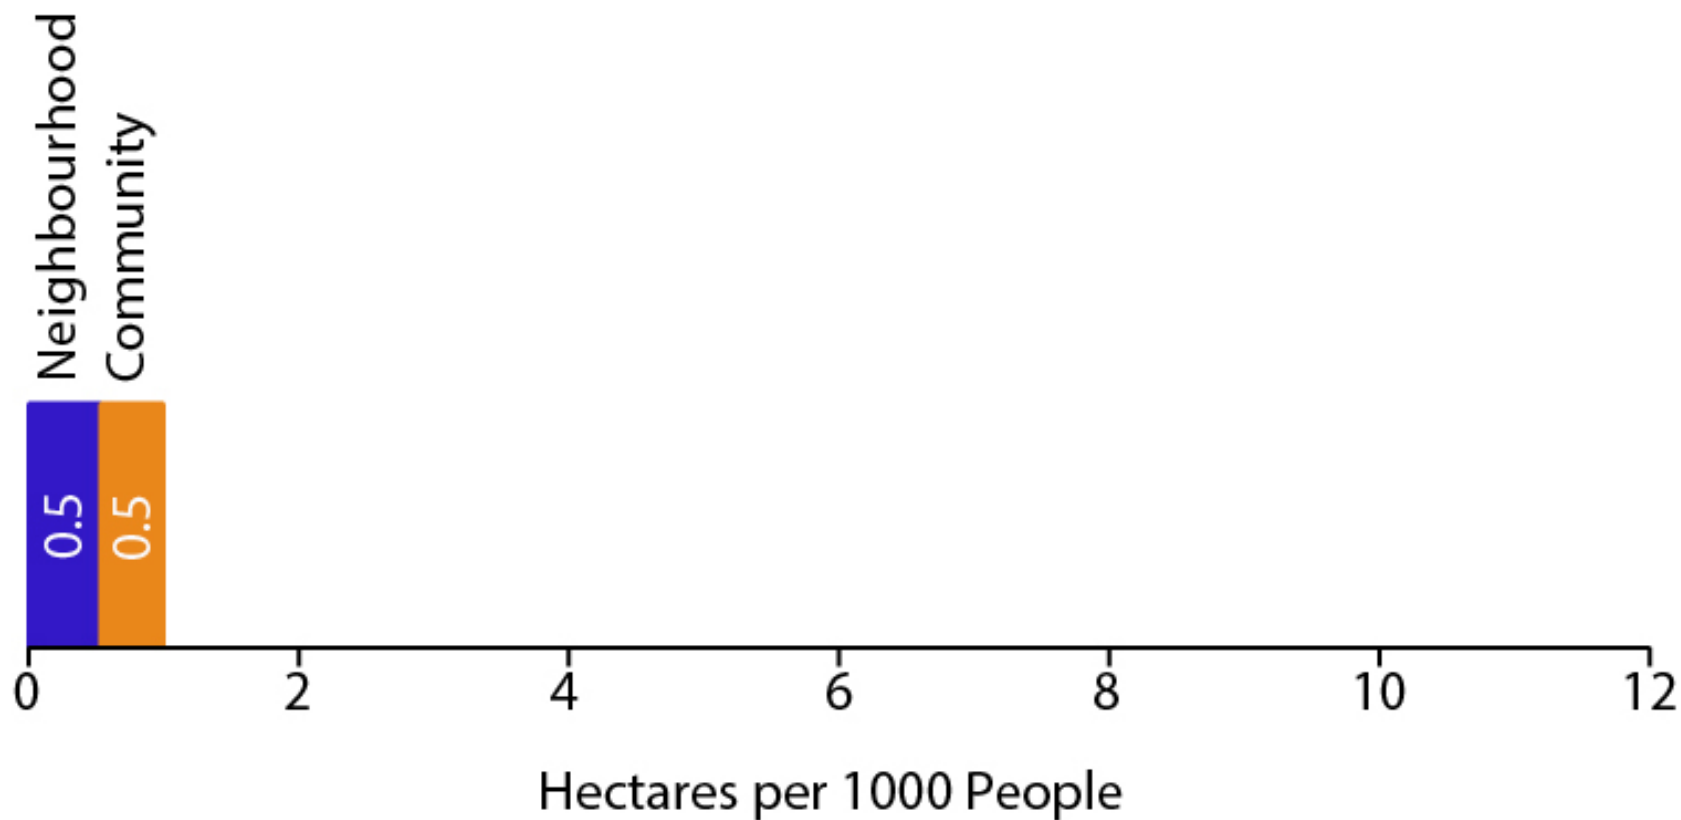

More Data...requested by Council

- ▶ How does the parks standard per 1000 population growth change as we add other components?

Funding Allocation: Parks Acquisition and Development

Parks Expenditures, by year

Funding Allocation: Parks Acquisition and Development

Parks expenditures, Total 2009 - 2016

What is the potential for a shift in the 'tilt'?

How much would Council consider shifting from acquisition to development?

Considerations:

- ▶ Risks: e.g. may miss out on some acquisition opportunities, might not be acquiring enough parkland for future needs
- ▶ Benefits: e.g. could meet more needs for parks development, could make more use of existing parklands
- ▶ Other shifts: Could Development funds come from other budget areas? e.g. Linear Parks may have benefits to other budget areas such as flood protection, active transportation, drainage

Setting Priorities: How to build a parks acquisition and development priority matrix

- ▶ Step 1 : Agree on criteria
- ▶ Step 2 : Place weight on each of the criteria

1. CONSISTENCY WITH PLANS

- ▶ Official Community Plan
- ▶ Infrastructure Plan
- ▶ Parks Master Plans

2. DEMOGRAPHICS

- ▶ Addressing gaps in provision for all ages and abilities
- ▶ Needs of current age-groups and characteristics
- ▶ Needs of future age-groups and characteristics

3. LOCATION

- ▶ Walkability
- ▶ Current park accessibility
- ▶ Proximity to other parks
- ▶ Connectivity improvement opportunities
- ▶ Destination for visitors and residents

4. COMMUNITY INPUT/NEEDS

- ▶ Deficiencies
- ▶ Priorities
- ▶ Addresses needs of user groups
- ▶ Addresses park type needs
- ▶ Addresses socio-economic inequalities

5. COSTS / FUNDING

- ▶ Municipal budget availability
- ▶ Land cost
- ▶ Added value
- ▶ Maintenance costs
- ▶ Long-term benefits
- ▶ Rehabilitation of existing facilities
- ▶ Provision of new facilities
- ▶ Funding availability from Developers
- ▶ Funding availability from Neighbourhood groups

6. USAGE LEVEL

- ▶ Anticipated user levels
- ▶ Differences / similarities between other parks
- ▶ Existing park capacity levels

7. ECONOMIC DEVELOPMENT

- ▶ Attraction for new visitors, e.g. Sports Tourism
- ▶ Visitor needs

Exercise: Create a parks acquisition and development priority matrix

Next Session

Workshop #3 - Developing Our Funding and Financing Strategy
