

consistent with the property's OCP future land use designation and the property is connected to City sanitary sewer and water.

To fulfill Council Policy No. 367, the applicant submitted a Neighbour Consultation Summary Form to staff on July 4, 2017, outlining that neighbours within 50m of the subject property were notified.

4.0 Proposal

4.1 Project Description

The applicant is proposing the rezone the subject property from RR1 – Rural Residential 1 to RU6 – Two Dwelling Housing in order to construct a second single detached house at the rear of the property (Attachment A). The property meets the RU6 requirements for two single detached houses: the lot is greater than 18.0m wide and has a lot area greater than 700m². Access for the proposed second house is through the existing driveway.

4.2 Site Context

The subject property is located in the Glenmore – Clifton – Dilworth City Sector, east of Clifton Rd. The property is connected to City sewer and water and is within the Permanent Growth Boundary.

Specifically, adjacent land uses are as follows:

Orientation	Zoning	Land Use
North	RR1 – Rural Residential 1	Residential
East	RR1 – Rural Residential 1	Residential
South	RR1 – Rural Residential 1	Residential
West	RR1 – Rural Residential 1	Residential

Subject Property Map: 1257 Rio Drive

5.0 Current Development Policies

5.1 Kelowna Official Community Plan (OCP)

Future Land Use

Single / Two Unit Residential (S2RES)¹ Single detached homes for occupancy by one family, single detached homes with a secondary suite or carriage house, semi-detached buildings used for two dwelling units, modular homes, bareland strata, and those complementary uses (i.e. minor care centres, minor public services/utilities, convenience facility and neighbourhood parks), which are integral components of urban neighbourhoods. Suitability of non-residential developments within the neighbourhood environment will be determined on a site-specific basis. Non-residential developments causing increases in traffic, parking demands or noise in excess of what would typically be experienced in a low density neighbourhood would not be considered suitable.

Development Process

Compact Urban Form.² Develop a compact urban form that maximizes the use of existing infrastructure and contributes to energy efficient settlement patterns. This will be done by increasing densities (approximately 75 - 100 people and/or jobs located within a 400 metre walking distance of transit stops is required to support the level of transit service) through development, conversion, and re-development within Urban Centres (see Map 5.3) in particular and existing areas as per the provisions of the Generalized Future Land Use Map 4.1.

Sensitive Infill.³ Encourage new development or redevelopment in existing residential areas to be sensitive to or reflect the character of the neighborhood with respect to building design, height and siting.
